Small Area Storage Real-time Temperature/ Humidity Monitoring

BlueTag TH10R   BlueTag TH30R   G100-S   G1000-S

This solution realizes real–time data monitoring and alarm notification. It is suitable for real–time environmental monitoring of cold rooms, labs, small warehouses and other small–area storage environments.The gateways and Bluetooth sensors can be combined together according to your own requirements. The sensors are designed to monitor field data and transmit the data to the GAEA series gateway via Bluetooth communication, and the gateway transfers the data received to Freshliance Cloud via WiFi or 4G network. All data are globally available via the cloud platform and mobile APP.

Remote data review and tracking via APP and cloud platform

Automated data graphing, analysis and processing

Offline data re–uploaded after network recovery

SMS, email and APP Push alert

Report data details to minutes or shorter, extreme value report available

Multi–level administration access optional
